

WOOD HEAT 2024

16th & 17th OCTOBER

THE DELTA NOTTINGHAM BELFRY

THE UK HEAT AND FUEL BIOMASS
INDUSTRY CONFERENCE

The REA's Wood Heat Conference 2024 will be an exciting opportunity to bring together the entire UK biomass heat and fuel industry to discuss, share, and promote best practice.

Join this year's Wood Heat Conference to get the entire UK industry together under one roof to get talking! As ever, we'll have a packed agenda and have strived to provide a platform where the industry can gather to network, share ideas and experiences, discuss some of the challenges we are facing, and look to the year ahead.

Building on the success of last year's conference, the agenda will focus on how we can improve the industry messages around some of our biggest challenges to growth, including myth busting issues on air quality and sustainability.

- *With a new government in place, this year's Wood Heat 2024 is set to be a crucial event for understanding what the latest change in administration will mean for the biomass heat industry*
- *Join us to hear about real success in the industry, highlighting new opportunities and insightful lessons on what we need to be doing to grow the sector*
- *What a Labour government means for our sector and how the REA's Wood Heat Forum is engaging with policymakers.*

These and many other topics will be covered either formally during the conference or in the many conversations that you'll have with each other - so there's never been more reason to make your presence known at the Wood Heat Conference.

Wood Heat 2024, the 7th such two day gathering, will give you the knowledge and contacts to make the most of the opportunities still to be found in the UK biomass energy sector - we're expecting a strong turnout from across the industry so get involved and support us.

Email Amalia Moca, Business Development Executive at REA to discuss your options — amoca@r-e-a.net.

WOOD HEAT 2024

16th & 17th OCTOBER

THE DELTA NOTTINGHAM BELFRY

THE UK HEAT AND FUEL BIOMASS
INDUSTRY CONFERENCE

Benefits of becoming a REA sponsor

Our reputation: The REA is the largest renewable energy and clean technology trade association in the UK and is one of the leading industry voices

Our mission: Help us to accelerate the energy transition as we empower our members to build commercially and environmentally sustainable businesses as we strive for a greener future built on renewable energy and clean technology

Our followers: Cross platform social media exposure with the potential to reach a new audience in excess of 20,000 users

Benefits of sponsoring the Wood Heat Conference

Attendance: Delegate tickets are competitive and usually sell out quickly, your sponsorship package confirms your place at this prestigious event

Networking and investment: Opportunities with the sector's leading wood fuel suppliers, biomass boiler and stove manufacturers, installers and distributors, energy companies, developers, and government stakeholders

Grow your network: Engage with other businesses present at the event to help in securing new business partnerships

Brand awareness: Enhance your professional reputation with your peers and strengthen existing relationships

Build your reputation in the biomass sector: Increase your visibility to attract new customers and sales opportunities

WOOD HEAT 2024

16th & 17th OCTOBER

THE DELTA NOTTINGHAM BELFRY

THE UK HEAT AND FUEL BIOMASS
INDUSTRY CONFERENCE

The Association for Renewable Energy and Clean Technology (REA) has been representing the biomass heat sector since 2001. The REA member forum for biomass heat is called the 'Wood Heat Forum'. It was formerly the Wood Heat Association a wholly owned subsidiary of the REA, but in October 2020 became a Forum and formally part of the REA.

About the REA Wood Heat Forum

The Wood Heat Forum brings together wood fuel suppliers, biomass boiler and stove manufacturers, installers and distributors, energy companies and developers. It also benefits from members of the wider REA.

We are planning an array of exceptional guest speakers from organisations such as DESNZ, Ofgem, UKPC, Woodsure, Biomass Connect, Supergen Bioenergy Hub, LC Energy, and many more. soon.

We are also working to ensure the best use of biomass recognises that one of the most efficient uses of biomass is in the direct production of heat, with a conversion efficiency approaching 90%. Such efficiencies need to be recognised in future policy discussions concerning 'best use' of biomass and the REA shall be advocating for this to be recognised in the new Government's upcoming Biomass Strategy.

We support our members across the UK by providing newsletters, website, technical information, updates on policy, as well as listening to and tackling their concerns, through national and local conferences and forums.
